PREMIUM PERGOLAS & CARPORTS · AUSTRALIA WIDE

“The best room in an Australian home
has no walls at all.”

Our story

Outdoor Spaces began with an architect and an ecommerce specialist who kept asking the same question from different sides of the world: why is it so hard to buy a genuinely well-designed outdoor structure in Australia?

The market offered two options. Catalogue kits sold on price, with the detailing quietly missing. Or bespoke builds priced beyond reach. Nothing in between spoke the language of architecture — proportion, light, honest materials — at a price a family renovation could carry.

So we built it. Outdoor Spaces curates engineered pergolas and carports from Australia's best manufacturers, presented with the technical clarity of an architectural practice, and offers fully custom structures designed by registered architects when the catalogue isn't enough.

Outdoor Spaces is part of Arch Spaces Group.

Our approach

1. Consultation

Whether you're after a single structure, a bespoke concept or a complete outdoor living plan, we start with your wishes. In a scheduled video consultation we discuss your style, your site, how you intend to use the space, and your budget — working from your photos, plans and measurements.

2. Advice & design

We translate your wishes into a clear recommendation that suits your home, garden and lifestyle. For custom structures this includes a realistic 3D visualisation incorporating the surroundings of your home, prepared by our registered architects. Already working with an architect, builder or landscaper? We coordinate with them directly.

3. Planning

You know exactly what to expect: a clear schedule, one dedicated point of contact, and guidance through engineering documentation and council permit pathways. We coordinate the parties involved so you don't have to.

4. Delivery & installation

From delivery through installation by accredited partners — or a complete self-build kit with assembly drawings if you'd rather build it yourself — to finishing touches and final checks. The result is a place where comfort and outdoor living come together in a way that suits you.

THE RANGE

Louvred pergolas

Sun when you want it, shelter when you need it. Motorised louvre roofs rotate from fully open to fully closed at the touch of a remote, with integrated gutters carrying rain away and optional LED lighting and side screens extending the season.

Every system we offer is engineered for Australian wind ratings and supplied with the documentation your certifier will ask for.

SIZES	3×3m to 6×4m standard; larger spans by design
STRUCTURE	Powder-coated aluminium, marine-grade hardware
OPTIONS	Motorised louvres, LED lighting, screens, rain sensors
INSTALL	Accredited installer network or self-build kit

THE RANGE

Timber pergolas

Nothing weathers into a garden the way hardwood does. Our timber structures are built from named Australian species with the detailing that determines whether a pergola lasts eight years or forty: posts lifted clear of the slab, sloped tops that shed water, every piece of end grain sealed.

Delivered pre-oiled in a natural tone with the maintenance schedule in the box — or specified in a durable hardwood left to silver to an even architectural grey.

SPECIES Spotted gum, ironbark, engineered glulam options

FINISH Penetrating oil systems; never film-forming varnish

DETAILING Stirrup-mounted posts, sealed end grain, sloped tops

CARE Wash & re-coat; horizontals 12–18 months

ENGINEERED KIT RANGE

OUTDOOR SPACES

CUSTOM · THE TIMBER NAVE

THE RANGE

Carports

A carport is the most honest structure on a property: engineered to a wind rating, built to shelter the second-biggest purchase you own, and seen every single day. Ours are fully engineered COLORBOND and aluminium systems, colour-matched to your roof, delivered with span tables and certification documents included.

Flat, gable or skillion profiles, single through to triple bays, freestanding or attached. Prefer timber? Our architect-designed carports — like the Timber Nave — are quoted through our custom design service.

SIZES Single, double and triple bay; custom spans quoted

STRUCTURE COLORBOND steel or powder-coated aluminium

ENGINEERING Wind-rated, documentation supplied for permits

INSTALL Accredited installer network or self-build kit

BESPOKE

Custom architectural structures

When the catalogue isn't the answer, our registered architects design from first principles: your site, your orientation, your planning overlays, the way you actually live outdoors.

We draw on traditions worth borrowing — Japanese joinery that locks timber with geometry rather than brackets, filigree structure that works daylight into moving shadow — and detail every connection for Australian engineering compliance. Concept sketches, 3D visualisation, documentation and fabrication through our precision manufacturing partners.

One structure, designed once, for one place.

PROCESS

Consultation → concept → 3D design →
documentation → fabrication

DESIGN

Registered architects, engineering coordinated

CRAFT

CNC-precision joinery, concealed fixings

The people behind Outdoor Spaces

Monty Balding

CO-FOUNDER · DESIGN

A registered architect with nine years across residential, commercial and education projects in Melbourne and London, most recently in design management on major workplace fit-outs. Monty leads product curation, custom design and the technical side of everything we sell — species, spans, joints and permits.

Phil Argyropoulos

CO-FOUNDER · DIGITAL & GROWTH

An ecommerce product leader with a decade across Shopify Plus builds, migrations and growth marketing — most recently leading a seven-market Shopify Plus migration for one of Europe's best-known consumer brands, alongside running his own digital agency since 2015. Phil leads the online experience, marketing and supplier partnerships.

Friends since high school in Melbourne — building things together ever since.

“Outside is not an afterthought.
It is where life opens up.”

BEGIN YOUR PROJECT

Start with a conversation

Tell us about your space in our two-minute survey, or book a consultation with our team. We'll respond with honest advice on what suits your site — whether that's a structure from our range, a self-build kit, or something designed just for you.
